## King's College Hospital selects Morley-IAS control panels for maximum fire safety

### ZX5Se control panels installed to provide fire protection across campus of London teaching hospital

King's College Hospital in Camberwell is one of London's largest and busiest teaching hospitals, serving the boroughs of Lambeth, Southwark, Lewisham and Bromley.

It is undergoing a major upgrade of fire protection at its main site in Denmark Hill, as part of a rolling programme of improvements that includes the installation of a helipad.

A single new fire protection system covering wards, public areas and operating theatres has been built using more than 30 Morley-IAS ZX5Se panels.

The system, which includes 11,000 detection devices, is networked to the hospital's security control room, where a repeater panel has been installed to alert staff in the event of a fire activation. The new programme of installation includes Ruskin Wing, the highest building on the campus, which is to be home to a helipad for the reception of trauma patients.

This major system upgrade is being undertaken by Morley-IAS partners Bespoke Detection Services (BDS) of Surrey. The firm commenced the project four years ago and last November was awarded the maintenance contract. It will fit more Morley-IAS panels as the project develops further, including the fitting out of fire protection in an on-call residence.

Operational accounts manager for BDS, Neil Buckfield, said: "This is not the first hospital project we have undertaken, but it is probably the largest. Morley-IAS panels have been chosen because they are renowned for their robustness, ease of installation and maintenance, making them ideal for an expanding project on a campus site of this size."

***"Morley-IAS panels are ideally suited to a hospital site of this size and complexity thanks to their robustness, ease of installation and maintenance"***

Neil Buckfield, Operational Accounts Manager, BDS

Morley-IAS by Honeywell is one of the world's leading designers and manufacturers of fire alarm control equipment and systems. Morley-IAS supplies control panels and fire detection products to professional, qualified fire alarm installers who will design and install a complete system as well as providing commissioning and maintenance support.
